#### Education

The BOSS education committee is concerned with a number of subjects within the department of Real Estate & Housing.

#### Evaluations:

Every year, BOSS organises in cooperation with students and members of staff a number of evaluations on specific courses from the department of RE&H. The results of these evaluations are published on the website of BOSS and printed in the BOSS magazine. Also, the department of RE&H uses the results for improving the education on our faculty.

#### Lectures:

In order to inspire students and give an addition to the already extensive number of interesting lectures provided by the department, as of the college year of 2009/2010 BOSS organises a number of lectures in the second semester. The lecturers are people who will tell about their personal experiences in their career within real estate.

#### Information:

BOSS education provides students with information about different courses and programs.

The information sessions focus either on students in their Bachelor or in their Masters. An example of an activity is the graduation cafe. This is organised in cooperation with the activities committee and provides students with information on their graduation path.
